Nickel Target AKQ515:
Reliable production and efficient
machining of this extremely tough
material are only possible with
AlCrN coated tools.

About Materials for Wear Protection

Uncoated tools can no longer live up to tough new standards. Today, all state-of-the-art tools need specialized coatings to extend tool life and fulfill the demanding needs of the application.

Raising the bar

The requirements for every precision tool and mould continue to grow to satisfy ever higher goals like:

- › Improved productivity
- › Longer tool life
- › Reliable production
- › Reduced cycle times

Specialized coatings for today's tools

Nowadays, most tool coatings are applied by the PVD-Arc process. This process gives the best ratio between layer growth rate (10 times higher than magnetron sputtering) and surface smoothness. The layers comprise of highly sophisticated layer structures made from many different types of materials.

With PVD-coated tools, remarkable improvements of performance are possible compared to uncoated tools. They not only permit a tool life which is several times longer than that of uncoated tools, but also, in many cases, a drastic rise of machining parameters.

Umicore Thin Film Products (TFP) provides the coating materials needed in the manufacturing of cutting, punching, forming and moulding tools.

Umicore – A world leader in materials technology

Umicore is a materials technology group. Its activities are centred on four business areas: Advanced Materials, Precious Metals Products and Catalysts, Precious Metals Services and Zinc Specialties. Each business area is divided into market-focused business units.

Umicore focuses on application areas where it knows its expertise in materials science, chemistry and metallurgy can make a real difference, be it in products that are essential to everyday life or those at the cutting edge of new technological developments. Umicore's overriding goal of sustainable value creation is based on this ambition to develop, produce and recycle materials in a way that fulfils its mission: **materials for a better life.**

Umicore Thin Film Products

Umicore TFP is a globally active business unit within the Umicore group and one of the leading producers of coating materials for physical vapour deposition (PVD) with more than 50 years of experience in this field.

Umicore TFP offers high quality coating materials for all current coating processes and applications with a product portfolio covering a wide range of highly effective evaporation materials, sputtering targets and accessories.

AlCrN coated gear cutter

Overview Sputtering Targets

Our sputtering targets are suitable for a wide range of cathodes in a various number of PVD sputtering systems.

System	Type	Dimension mm	Ti Grade 2	TiAl 50/50	TiAl 33/67	TiAl 67/33	TiAl 30/70	TiAl 25/75	TiAl 40/60	AlCr 70/30	Cr 99.8%	Zr 99.2%	WC 99.5%	B,C 99.5%	Nb 99.7%
Oerlikon	BAI1200	Ø 160 x 12	●	●	●					●	●	●

Other targets in accordance with customers' specifications are available on request.

TiAl sputtering target

Coating Equipment INNOVA

INNOVA from Oerlikon Balzers, a new-generation coating system. It can deposit not only proven high performance nitride coatings but now – for the first time – hard aluminum oxide coatings as well.

Sputtering Targets

Targets OC Oerlikon Balzers BAI 1200, RCS, Innova

Description	Material	Purity	Form	Package Size	Part Number
AlCr	70/30 at%	99.5%	Ø 160 x 12 mm monoblock	8 pcs	0700659
